Network Connectivity

The DCP-9040CN is network ready, making colour printing, copying and scanning available to all workgroup members. To keep your data safe and private there's SSL-Secure Socket Layer for secure printing and network management (encrypted data). SSL is a protocol often used for secure internet shopping and banking. When used for printing the data is encrypted at the PC and sent through the network to the printer, then decoded and printed. To facilitate this, printing must be done through IPP [Internet Printing Protocol].
